Dan:

FYI. Things are going well with Collier County staff and I believe all is worked out to start removal of soil at Site C.

Ms. Douglas,

EPA Region 4 is in agreement with the Florida Department of Environmental Protection (FDEP) that we have no objections to the submitted plan for the cleanup of Site C on Marco Island. As indicated in the plan, this clean-up must be conducted in accordance with all of the regulatory requirements of the Asbestos National Emission Standard for Hazardous Air Pollutants (NESHAP) contained in 40 C.F.R. Part 61, Subpart M. It is also EPA's understanding that any soil with positive results for the presence of asbestos will be disposed of as asbestos-containing waste material.

RE: Assistance

Upon our review to site C plan, the Department has no objections to the plan.

Sherrill

Good Day,
Can someone help? The City of Marco Island has submitted the notification to DEP to begin work on Thursday. EPA spokesperson Laura Niles was quoted in the paper that EPA and DEP have no objections; however Collier County wants something in writing that the work plan has been reviewed and EPA and DEP have no objections.

Can someone email us ASAP?

We are only speaking of Site C.

Thank you.
