Good Morning Mr. Caplan and Mr. Iglehart,

Last night, the City of Marco Island City Council directed staff to move forward with the agreement to remove AC material from the Glon Property. In summary, Quality will remove the rubble pile from Site A as a regulated material and deposit the material at a regulated landfill. The rubble pile will be removed in its entirety within 90 days of acquisition by Quality of any required permits or approvals. Quality will also remove approximately 12 inches of soil beneath the rubble pile. We anticipate the time for beginning this project is within 30 days. Once we receive a more specific date we will provide the Notification of Asbestos Abatement as required.

Thank you for your continued efforts to assist the City in resolving this matter.

Lisa M. Douglass
